Mountera® Wall Bracket

Mountera® bracket for the installation of camera systems on walls or on a Mountera® Box

The innovative **Mountera® Quick-Lock System** is a completely new concept for **quick and easy installation** of the latest camera and Panomera® systems. The Mountera® system consistently continues the **elegant design line** of the camera systems, allowing visually appealing and yet **robust installations without visible cables**. The comprehensive system offers a wide range of **mounting options** and, in **combination with the power supply or recording on site**, it is also attractive for its **discreet installation that is reduced to the essentials**.

Plug-Adjust-Lock
The innovative Mountera® Wall Bracket is equipped with the specially developed Mountera® Lock. After the bracket has been installed, the camera system can be clicked in safely with its Mountera® Plug and optimally aligned at a horizontal angle of 170°. The final locking is made just as easy with one adjusting screw only.

Internal cable routing
The internal cable routing of the bracket provides sufficient space for all necessary cables and the mandatory safety cable of the camera system. At the transition between the camera system and the bracket, the entire cabling is covered by the weatherproof Mountera® sleeve. This makes the entire system stand out due to its harmonious and safe appearance without any visible cables.

Finish
Like the camera systems, the Mountera® Wall Bracket is made of torsion resistant and robust aluminium. Its chromated surface has a signal white (RAL 9003) powder coating, which has been tested for seawater resistance according to DIN EN 60068-2.

Compatibility
The Mountera® Wall Bracket is compatible with all camera and Panomera® systems equipped with the Mountera® Plug.

The Mountera® Wall Bracket can be installed directly on a wall or on a Mountera® Box.

Scope of delivery
- Mountera® Wall Bracket
- Mountera® Lock included
- 4× loss-proof screws
